

# Dana Point Harbor Breakwater Condition Study

Ocean survey and data collection operations will be conducted in Dana Point Harbor from October 20, 2009 to October 31, 2009, weather permitting.

A survey vessel will need to take numerous passes along both sides of the Harbor's two breakwaters and within the Harbor; it will be operating Monday through Friday between 6:00am and 6:00pm. The vessel will be clearly marked and have warning lights to signal other vessels of its position. Boaters are advised to use caution while transiting the affected areas, transit at their slowest speed to minimize wake, and proceed with caution.

All vessels and survey equipment will monitor VHF Channel 16.

For additional information or questions,  
please contact OC Dana Point Harbor at (949) 923-2286.
